Dear Sir or Madam:

This letter will serve as a 30 day notification pursuant to Section 6 of the Dietary Supplement Health and Education Act of 1994 that NBTY Inc. is using the following statements on our Radiance supplement:

- Coenzyme Q-10 plays a role in the body's production of adenosine triphosphate (ATP), the basic energy component of the human cell.
- Coenzyme Q-10 plays a role in neutralizing harmful free radicals in cells.
- Garlic plays a role in decreasing the stickiness of platelets, a type of blood cell.
- Garlic contains the active ingredients alliin, allinase and allicin.
- Garlic contains the odorless amino acid derivative, alliin, also known as S-allyl-L-cysteine sulfoxide (SAC). The substance that gives garlic its pungent odor is called allicin.
- Garlic promotes cardiovascular health.
- Green tea contains naturally-occurring phytochemicals called catechins and flavonoids.
- The botanical name for green tea is Camellia senensis.
- Pycnogenol is a complex of naturally-occurring flavonoids also called proanthocyanidins.
- Red Wine Extract contains polyphenols called flavonoids.
- Two of these flavonoids are quercetin and *trans*-resveratrol.
- Ginseng improves physical performance.

The above statements are accompanied by the required disclaimer pursuant to Section 6 of the Dietary Supplement Health and Education Act.

Sincerely,

Ona Scandurra, MS, RD  
Nutritionist
